

# **PE1919/S: Ban the sale of high caffeine products to children for performance enhancement**

## **Petitioner written submission, 25 April 2024**

Based on the considerable evidence on the dangers of taking an acute caffeine dose for performance enhancement, I believe it is a breach of health and safety regulations to promote caffeine gum at public events. It was therefore unlawful and the governing bodies should have taken action to ensure public safety at all UK Athletics licensed events.
