

Cross-Party Group on Life Sciences

Tuesday 20th February 2024, 5.45pm – 7.15pm

Agenda

Agenda item 1

Opening, Welcome and Introductions, Convener, Kenneth Gibson MSP

Agenda item 2

Minutes of the previous meeting (November 14, 2023)

Agenda item 3

Scotland's Healthcare Data: A national asset?

This presentation will set out the key activities required to realise the full potential of Scotland's data assets and recognise the progress to date. It will highlight the AIM4ALL project, demonstrating how digital innovation can unlock value, deliver benefits for patients and support clinicians while at the same time stimulating R+D and generating health and economic benefit for Scotland.

Fiona Hamill, Senior Manager, Enterprise Government Affairs & Policy UK, Johnson and Johnson, Professor George Crooks, CEO, The Digital Health and Care Innovation Centre DHI, William Kendall, Product Manager DHI and Dr David Irvine, Consultant Haematologist. Queen Elizabeth University Hospital, Glasgow

Agenda item 4

Unlocking data to save time, money, and lives.

This talk will outline how making data available for research is of vital importance to the life sciences industry and can support health and wellbeing more widely. It will summarise the challenges in doing this and the transformation programme that Research Data Scotland is undertaking to make fast, trustworthy access to data for research a reality in Scotland.

Professor Roger Halliday, CEO, Research Data Scotland
